

CONCEPTO TÉCNICO DE PRECISIÓN A LA CARTOGRAFÍA

CONCEPTO TÉCNICO No. 011 DEL 03 DE AGOSTO DEL 2.018

FECHA: 03 DE AGOSTO DEL 2.018

ASUNTO: Precisión al límite de la Reserva Forestal Protectora Nacional de la hoya hidrográfica de la Laguna "La Cocha" y el Cerro "Patascoy", declarada mediante el Acuerdo No. 5 de 1.971, aprobado por la Resolución Ejecutiva No. 231 de 1.971; modificada mediante el Acuerdo No. 58 de 1.973, aprobado por la Resolución Ejecutiva No. 073 de 1.974

1. ANTECEDENTES

El artículo primero de la Resolución No. 231 del 19 de agosto de 1.971 del Ministerio de Agricultura, aprueba el Acuerdo No. 5 del 24 de febrero de 1.971, emanado de la Junta Directiva del Instituto Nacional de los Recursos Naturales Renovables y del Ambiente –INDERENA- cuyo texto es el siguiente: "Por el cual se reserva y declara la Zona Forestal Protectora y de Interés General la Hoya Hidrográfica de la Laguna de La Cocha y el Cerro de Patascoy, ubicados en el Municipio de Pasto, departamento de Nariño".

Por otra parte, el artículo primero de la Resolución No. 73 del 22 de marzo de 1.974 del Ministerio de Agricultura, aprueba el Acuerdo No. 58 del 28 de diciembre de 1.973, emanado de la Junta Directiva del Instituto Nacional de los Recursos Naturales Renovables y del Ambiente –INDERENA- cuyo texto es el siguiente: "Por el cual se modifica el Acuerdo No. 5 del 24 de febrero de 1.971, relativo a la zona forestal protectora y de interés general de la hoya hidrográfica de la laguna "La Cocha" y el Cerro "Patascoy", en el municipio de pasto, Departamento De Nariño".

Ahora bien, el artículo primero del Acuerdo No. 58 del 28 de diciembre de 1.973, describe los linderos que delimitan el área declarada como Zona Forestal Protectora y de Interés General de la hoya hidrográfica de la Laguna "La Cocha" y el Cerro "Patascoy", ubicada en el municipio de Pasto, departamento de Nariño.

En el año 2.005, la publicación "Reservas Forestales Nacionales de Colombia - Atlas básico" elaborado por Conservación Internacional Colombia, Ministerio de Ambiente, Vivienda y Desarrollo Territorial y La Embajada Real de los Países Bajos, presenta la materialización cartográfica de la Reserva en mención, en donde se muestra con líneas punteadas el límite sur.

F-E-SIG-26-V1. Vigencia 09/02/2016

Calle 37 No. 8 - 40
Conmutador (571) 3323400
www.minambiente.gov.co

Cabe señalar que en la presentación dicha publicación indica *“los polígonos que definen las diferentes reservas se dibujaron siguiendo rigurosamente la delimitación descrita en el acto administrativo de creación de cada una de ellas, pero en algunos casos no fue posible efectuar este trazado con precisión, debido a deficiencias en la información toponímica contenida en las cartas geográficas, o a las inconsistencias que en algunos casos presenta la descripción de los límites, especialmente en lo que tiene que ver con la definición de rumbos y distancias. Cuando se presentaron estas circunstancias se optó por trazar el límite con una línea discontinua”*.

Ante la necesidad de precisar la información presentada en la mencionada publicación, este Ministerio suscribió con el Instituto Geográfico Agustín Codazzi – IGAC el contrato interadministrativo No. 282 del 2.014, para brindar apoyo técnico en la documentación de los nombres geográficos relacionados en el artículo primero del Acuerdo No. 58 del 28 de diciembre de 1.973, aprobado por Resolución No. 73 del 22 de marzo de 1.974 del Ministerio de Agricultura; de esta manera se obtuvo los insumos para realizar la precisión a la materialización cartográfica de la Reserva Forestal Protectora Nacional de la hoya hidrográfica de la Laguna “La Cocha” y el Cerro “Patascov”.

Por otra parte, mediante Resolución No. 0994 del 16 de junio de 2.008 del Ministerio de Ambiente y Desarrollo Sostenible, se declara, reserva y alindera el Santuario de Flora “Plantas Medicinales Orito – Ingi Ande”, generando de esta manera traslape o superposición con la mencionada Reserva Forestal Protectora Nacional de la hoya hidrográfica de la Laguna “La Cocha” y el Cerro “Patascov”.

Por lo anterior, se aplica lo establecido en el artículo 26 del Decreto 2372 de 2.010, (compilado en el Decreto 1076 de 2.015), sobre superposición de categorías de áreas protegidas: *“No podrán superponerse categorías de manejo de áreas públicas...”*. *“Cuando la superposición se presente con un área del Sistema de Parques Nacionales Naturales, la categoría superpuesta se entenderá sustraída sin la necesidad de ningún trámite y solo se registrará oficialmente la categoría del área del Sistema de Parques Nacionales Naturales”*.

Ahora bien, mediante Acuerdo No. 003 del 26 de abril de 2.018 del Consejo Directivo de la Corporación Autónoma Regional de Nariño – CORPONARIÑO, se declara el Páramo de las Ovejas-Tauso como Parque Natural Regional, con la declaración mencionada se genera traslape o superposición con la Reserva Forestal Protectora Nacional de la hoya hidrográfica de la Laguna “La Cocha” y el Cerro “Patascov”; respecto a lo anterior, es de resaltar que la Corte Constitucional, en sentencia C-598 de 2010 consideró que es los Parques Naturales resultan clave para la preservación de un medio ambiente sano así como para la protección de la biodiversidad en los términos del Convenio sobre la Biodiversidad cuyas finalidades son: (i) “asegurar la continuidad de los procesos ecológicos y evolutivos naturales para mantener la diversidad biológica”; (ii) “garantizar la oferta de bienes y servicios ambientales esenciales para el bienestar humano”; (iii) “garantizar la permanencia del medio natural, o de alguno de sus componentes, como fundamento para el mantenimiento de la diversidad cultural del país y de la valoración social de la naturaleza”.

Respecto a lo anterior, la Oficina Asesora Jurídica del Ministerio de Ambiente y Desarrollo Sostenible mediante memorando No. OAJ-8140-31-009245 de junio del 2018, teniendo en cuenta lo establecido por la Corte Constitucional y dada la importancia que revisten las áreas del Sistema de Parques Nacionales Naturales, establece que *"...al encontrarse frente a una situación de traslape entre un Parque Natural Regional y una Reserva Forestal Nacional, prevalece la figura de Parque Natural Regional por cuanto las normas que los regulan son más estrictas y en consecuencia los usos permitidos, prohibiciones, administración y manejo, instrumentos de planificación, entre otras, deberán sujetarse a lo dispuesto para las áreas del Parque Natural Regional."*

INFORMACIÓN BASE

Acuerdo No. 5 del 24 de febrero de 1971, aprobado por el Ministerio de Agricultura por medio de la Resolución No. 231 del 19 de agosto de 1971: "Por el cual se reserva y declara la Zona Forestal Protectora y de Interés General la Hoya Hidrográfica de la Laguna de La Cocha y el Cerro de Patascoy, ubicados en el Municipio de Pasto, departamento de Nariño"

Acuerdo No. 58 del 28 de diciembre de 1973, aprobado por el Ministerio de Agricultura por medio de la Resolución No. 73 del 22 de marzo de 1.974: "Por el cual se modifica el Acuerdo No. 5 del 24 de febrero de 1.971, relativo a la zona forestal protectora y de interés general de la hoya hidrográfica de la laguna "La Cocha" y el Cerro "Patascoy", en el municipio de pasto, Departamento De Nariño"

Información cartográfica de la Reserva Forestal Protectora de la hoya hidrográfica de la laguna "La Cocha" y el Cerro "Patascoy": La información cartográfica oficial correspondiente al límite de la Reserva Forestal Protectora Nacional de la hoya hidrográfica de la laguna "La Cocha" y el Cerro "Patascoy", denominada "Laguna_la_Cocha_Cerro_Pataskoy.shp", que hace parte de la publicación "Reservas Forestales Protectoras Nacionales de Colombia – Atlas Básico", editado por Vásquez, Víctor Hugo (2005), producto del convenio entre Conservación Internacional Colombia, Ministerio de Ambiente, Vivienda y Desarrollo Territorial y La Embajada Real de los Países Bajos.

Productos Contrato Interadministrativo No. 282 de 2014: Informe final de actividades con cartografía anexa "ANÁLISIS HISTÓRICO, LINGÜÍSTICO Y GEOGRÁFICO DE LA TOPONIMIA DE LA ZONA FORESTAL PROTECTORA Y DE INTERÉS GENERAL DE LA HOYA HIDROGRÁFICA DE LA LAGUNA DE LA COCHA – CERRO PATASCOY. IGAC, 2014.

Resolución No. 0994 del 16 de junio de 2.008: "Por medio de la cual se declara, reserva y alindera el Santuario de Flora "*Plantas Medicinales Orito – Ingi Ande*".

Acuerdo No. 003 del 26 de abril de 2.018: "Por el cual se declara el Páramo de las Ovejas-Tauso como "*Parque Natural Regional*".

2. ANÁLISIS DE LA INFORMACIÓN Y CONSIDERACIONES

La materialización cartográfica realizada por Conservación Internacional Colombia y la Embajada Real de los Países Bajos en el marco del convenio con el Ministerio de Ambiente, Vivienda y Desarrollo Territorial, presentaba imprecisiones en el trazado del polígono, debido a deficiencias en la información toponímica contenida en las cartas geográficas, o a las inconsistencias en la descripción de los límites, especialmente en lo que tiene que ver con curvas de nivel y ubicación y toponimia de ríos.

Debido a lo anterior fue necesario el apoyo técnico del IGAC, quien contribuyó a precisar la ubicación de los objetos geográficos descritos en la resolución de modificación a la delimitación de la reserva forestal. Con base en los resultados de la investigación adelantada por el IGAC, se procedió a actualizar el polígono que delimita la RFPN de la hoya hidrográfica de la laguna "La Cocha" y el Cerro "Patascoy", en el municipio de Pasto, Departamento de Nariño.

Por otra parte, el artículo primero del Acuerdo No. 58 del 28 de diciembre de 1973, describe los linderos que delimitan el área declarada como Zona Forestal Protectora y de Interés General de la hoya hidrográfica de la Laguna "La Cocha" y el Cerro "Patascoy" de la siguiente manera:

"NORTE: *"Partiendo de la cuchilla El Tábano en el cruce de la carretera que conduce al Encano a 3.000 metros de altura sobre el nivel del mar, se sigue por esta cuchilla hasta llegar al Cerro Bordoncillo a 3.700 metros de altura sobre el nivel del mar. De este punto y bordeando la cuchilla hasta llegar a la parte más alta de Quilinsayaco, en la región denominada Piscicultura."*

"ESTE: *De este punto y bordeando la cuchilla que sirve de límite entre el Departamento de Nariño y la Comisaria del Putumayo, pasando por la depresión de San Andrés, hasta encontrar los picachos del Cerro Patascoy, se continua por estos (3.000 metros sobre el nivel del mar), hasta encontrar el nacimiento del río Patascoy. De este punto, aguas abajo del citado río, hasta encontrar la Cota 2.500 metros sobre el nivel del mar".*

"SUR: *A partir de la Cota 2.500 metros sobre el nivel del mar, se sigue en dirección Este – Oeste, hasta encontrar la desembocadura del Río Verde en el Río Guamuez, se sigue aguas arriba del Río Verde hasta encontrar su nacimiento en el Cerro del Alcalde".*

"OESTE: De este punto se sigue por todo el límite con el Municipio de Funes hasta encontrar la cuchilla de Los Alisales. De este sitio y por el filo de la cuchilla en dirección Norte – Este, hasta encontrar la cuchilla El Tábano, punto de partida".

1. "Partiendo de la cuchilla El Tábano en el cruce de la carretera que conduce al Encano"

En este vértice se identifican dos nombres geográficos objeto de documentación: **La Cuchilla El Tábano** y el cruce con la **carretera que conduce al Encano**. La Cuchilla El Tábano, es un objeto geográfico localizado en la plancha 429IID del IGAC a escala 1:25.000 del año de 1.975 y a escala 1: 100.000 del 2.009. Esta cuchilla pertenece al sistema orográfico del nudo de los Pastos, bordea la laguna de la Cocha en la parte noroeste y es divisoria de aguas entre los ríos que pertenecen a la cuenca del río Patía y los de la cuenca del Amazonía. Su nombre fue corroborado con la consulta de documentación histórica y geográfica e identificada por investigadores de la región y por los habitantes de la zona.

Por otra parte, el cruce de la Cuchilla El Tábano con la carretera al Encano (Monumento a la Divina Pastora) fue espacializado cartográficamente en la carta geográfica del departamento de Nariño de 1.924 a escala 1:500.000, en la cartografía a escala 1:100.000 del año 2.009 y en fotografías aéreas de 1.995. Ahora bien, en el trabajo de campo se identificó como el punto más alto de la vía o el camino y en él se encuentra ubicada la imagen de la **Divina Pastora**, la cual es la patrona de los habitantes del corregimiento de El Encano. (IGAC, 2.014)

Considerando lo anterior, se define lo siguiente: **Vértice No. 1; "Partiendo de la cuchilla El Tábano en el cruce de la carretera que conduce al Encano, punto con coordenadas X: 988401,414019 y Y: 621723,78975;..."**

Figura No. 1 Ubicación del vértice No. 1. Cruce de la Cuchilla El Tabano con la carretera que conduce al Encano. IGAC, 2014.

Figura No. 2 Vista de la cuchilla El Tabano y del río El Encano. Fuente: Comisión de Trabajo de Campo. IGAC, 2014.

Calle 37 No. 8 - 40
Conmutador (571) 3323400
www.minambiente.gov.co

2. "...se sigue por esta cuchilla hasta llegar al Cerro Bordoncillo a 3.700 metros de altura sobre el nivel del mar..."

El Cerro Bordoncillo es un objeto geográfico que se encuentra en la carta geográfica del departamento de Nariño del año 1.924 a escala 1:500.000; en el documento del Ministerio de Trabajo "Nariño sus modalidades geográficas, económicas y sociales de 1.959" a escala 1:500.000; en la plancha cartográfica No. 429IID del IGAC, año 2.009 a escala 1:100.000 y en fotografías aéreas de 1.995. Este cerro pertenece al sistema orográfico del nudo de los pastos y bordea el norte de la Laguna de La Cocha. Por otra parte, en la documentación histórica se presenta como un volcán que en la actualidad es inactivo; a la vez, hace parte de la zona del páramo que cubre un área extensa y junto con la cuchilla El Tábano y el páramo Piscicultura forman la divisoria de aguas de la cordillera centro – oriental. (IGAC, 2.014)

Finalmente, el cerro se encuentra mucho más al norte y hace parte de la Subcuenca del río Buesaquito; en la actualidad hace parte de la jurisdicción del municipio de Buesaco, topónimo identificado por la comunidad que habita la laguna y el corregimiento de El Encano.

Considerando lo anterior, se define lo siguiente: **Vértice No. 2 "...se sigue por esta cuchilla hasta llegar al Cerro Bordoncillo a 3.700 metros de altura sobre el nivel del mar, punto con coordenadas X: 995090,593059 y Y: 626090,360494; ..."**

Figura No. 3 Vista de la Laguna de La Cocha desde el páramo Bordoncillo. Fuente: Germán Narváez. Geógrafo investigador de la Universidad de Nariño. 2014.

Figura No. 4 Ubicación del vértice No. 2 Cerro Bordoncillo a 3.700 metros de altura sobre el nivel del mar. IGAC, 2014.

3. “...De este punto y bordeando la cuchilla hasta llegar a la parte más alta de Quilinsayaco, en la región denominada Piscicultura...”

En este vértice se identifican dos nombres geográficos objeto de documentación: **la parte más alta de Quilinsayaco** y **la región denominada Piscicultura**. Al realizar la verificación en la cartografía IGAC a escala 1:25.000 del año de 1.975 y de fotografías aéreas de 1.995, Quilinsayaco hace referencia a la quebrada afluente de la Laguna La Cocha; por lo tanto, la parte más alta de Quilinsayaco, está indicando un cerro que los habitantes conocen como “Capuchino” y allí nace la quebrada. (IGAC, 2.014)

Por otra parte, la Región Piscicultura es un objeto geográfico que no se registra en la cartografía ni en las fotografías aéreas; con el trabajo de campo se encontró que para los años 70 los habitantes de la zona conocían a este sector como región Piscicultura donde se ubicaban piscinas dedicadas a la actividad piscícola, en la actualidad a la zona se le conoce como “páramo de La Piscicultura”. (IGAC, 2.014)

Considerando lo anterior, se define lo siguiente: **Vértice No. 3 “...De este punto y bordeando la cuchilla hasta llegar a la parte más alta del Cerro Capuchino, en la región denominada como Páramo de La Piscicultura, punto con coordenadas X: 995090,593059 y Y: 626090,360494; ...”**

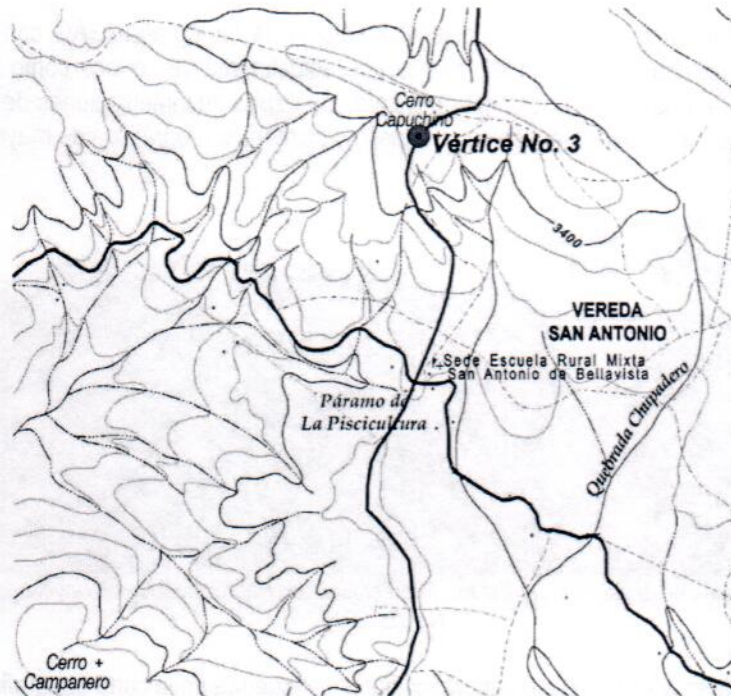

Figura No.5 Ubicación del vértice No. 3 Parte más alta del Cerro Capuchino, en la región denominada como Páramo de La Piscicultura. IGAC, 2014.

4. "...De este punto y bordeando la cuchilla que sirve de límite entre el Departamento de Nariño y la Comisaria del Putumayo, pasando por la depresión de San Andrés, hasta encontrar los picachos del Cerro Patascoy..."

En este vértice se identifican dos nombres geográficos objeto de documentación: **La depresión de San Andrés** y **los picachos del Cerro Patascoy**.

Al realizar la consulta del objeto geográfico "depresión de San Andrés" en los archivos históricos de cartografía y fotografías aéreas del IGAC, así como en cartografía de Ministerios y otras entidades estatales, en el mapa de "Estudios Geológicos en el departamento de Nariño" del Ministerio de Minas y Petróleo del año 1.947 a escala 1:150.000 y en el trabajo de campo realizado en la zona, no se confirmó el elemento de interés; igualmente, los habitantes de la zona no identifican el topónimo "San Andrés" como una depresión ni como otro elemento geográfico.

Sin embargo, al superponer la localización de este elemento en la cartografía IGAC con la que aparece en la cartografía referenciada del año 1.947, coincide con lo que actualmente se conoce como la “**zona de páramos Azonales**”; esta zona es la divisoria de aguas del río Estero, localizada en inmediaciones de las veredas Naranjal y El Estero comprendida entre los cerros Capuchino y Patascoy, elementos orográficos de mayor altura. (IGAC, 2.014)

Figura No. 6 Páramos Azonales en el valle del río Estero. Fuente: Germán Narváez. Geógrafo investigador de la Universidad de Nariño. 2014.

Por otra parte, el cerro Patascoy es un objeto geográfico que se encuentra en la carta geográfica de departamento de Nariño de 1.924 a escala 1:500.000, en el mapa del DANE con base en la Oficina de Longitudes del año 1.950 a escala 1:100.000, en Nariño sus modalidades geográficas, económicas y sociales del año 1.959 a escala 1:500.000, en la cartografía IGAC del año 2.009 a escala 1:100.000 y en fotografías aéreas de 1995; por último, fue verificado en campo y es reconocido por los habitantes de la región, es uno de los elementos más conocidos de la región y hace parte del sistema orográfico que encierra el valle de la Laguna de La Cocha. (IGAC, 2.014)

Este cerro forma la sierra conocida como “Picachos del Patascoy”, siendo el cerro más alto a 3.500 msnm. Patascoy es un volcán inactivo y para las comunidades indígenas que existieron y que aún existen en el territorio es un cerro sagrado que forma parte de sus cosmogonías.

Figura No. 7 Picachos del Cerro Patascoy. Fuente: Germán Narváez. Geógrafo investigador de la Universidad de Nariño. 2014.

Considerando lo anterior, se define lo siguiente: **Vértice No. 4;** "...De este punto y bordeando la cuchilla que sirve de límite entre el Departamento de Nariño y el Departamento del Putumayo, pasando por la zona de páramos Azonales, hasta encontrar los picachos del Cerro Patascoy, punto con coordenadas X: 1000533,44949 y Y: 596084,801623; ..."

Figura No. 8 Ubicación del vértice No. 4 Cruce de la Cuchilla El Tábano con la carretera que conduce al Encano. IGAC, 2014.

5. "...se continua por estos (3.000 metros sobre el nivel del mar), hasta encontrar el nacimiento del río Patascoy. De este punto, aguas abajo del citado río, hasta encontrar la Cota 2.500 metros sobre el nivel del mar. ..."

El Río Patascoy es un objeto geográfico que se encuentra localizado en la cartografía IGAC del 2.009 a escala 1:100.000. Los habitantes de la región conocen de la existencia del río localizado al sur de la laguna de La Cocha que desemboca en el Guamuez al costado derecho aguas abajo. Para la verificación del nacimiento del río Patascoy, se realizó cartográficamente debido a las difíciles condiciones topográficas del terreno y la espesa cobertura vegetal de selva. Este río hace parte de la Subcuenca del río Guamuez y esta a su vez pertenece a la cuenca hidrográfica del río Amazonas; por último, este objeto geográfico es un referente del límite departamental entre Putumayo y Nariño. (IGAC, 2.014)

Como se mencionaba anteriormente, esta parte del polígono de que trata la Resolución No. 073 de 1.974 modificación a los linderos de la Reserva Forestal Protectora Nacional de la hoya hidrográfica de la Laguna "La Cocha" y el Cerro "Patascoty", se superpone o traslapa espacialmente con áreas del Santuario de Flora "Plantas Medicinales Orito - Ingi Ande", por tal motivo fue necesario precisar el límite sur de la RFPN de la hoya hidrográfica de la Laguna "La Cocha" y el Cerro "Patascoty".

Figura No. 9 Ubicación del vértice No. 5 y 6. IGAC, 2014.

Considerando lo anterior, se define lo siguiente: **Vértice No. 5**; "...se continua por estos (3.000 metros sobre el nivel del mar) hasta encontrar la divisoria de aguas entre el Río Guamués y el Río Patascoty, punto con coordenadas X: 996137,894133 y Y: 585527,383904. De este punto, se sigue por el límite del Santuario de Flora

F-E-SIG-26-V1. Vigencia 09/02/2016

Calle 37 No. 8 - 40
Conmutador (571) 3323400
www.minambiente.gov.co

“Plantas Medicinales Orito – Ingi Ande” y que sirve de divorcio de aguas entre el Río Guamués y el Río Patascoy, hasta encontrar la Cota 1.600 metros sobre el nivel del mar, punto con coordenadas X: 993145,229926 y Y: 582866,928649. ...”

6. “...A partir de la Cota 2.500 metros sobre el nivel del mar, se sigue en dirección Este – Oeste, hasta encontrar la desembocadura del Río Verde en el Río Guamuez, ...”

El Río Verde es un elemento geográfico que se encuentra señalado en la carta geográfica del departamento de Nariño de 1.924 a escala 1:500.000, en el mapa denominado “Estudios Geológicos en el departamento de Nariño” del Ministerio de Minas y Petróleo del año 1947 a escala 1:150.000 y en el mapa del DANE con base en la Oficina de Longitudes del año 1.950 a escala 1:100.000. Actualmente no se encontró en la cartografía IGAC a escala 1:100.000, la verificación de este objeto geográfico fue a partir de la documentación histórica en el documento “Por el sur de Colombia: excursión pintoresca y científica al Putumayo”, escrito por el ingeniero Miguel Triana del año 1905. Durante el trabajo de campo se logró identificar mediante la consulta académica con el docente de la Universidad de Nariño Germán Narváez y el señor Luciano Piscal habitante de la vereda Santa Isabel del corregimiento El Encano, quien realizó la travesía por el río en los años 50. (IGAC, 2.014)

Por otra parte, la desembocadura del río Verde en el río Guamuez es un objeto geográfico que se verificó mediante la carta geográfica del departamento de Nariño de 1.924 a escala 1:500.000, en el mapa denominado “Estudios Geológicos en el departamento de Nariño” del Ministerio de Minas y Petróleo del año 1947 a escala 1:150.000 y en el mapa del DANE con base en la Oficina de Longitudes del año 1950 a escala 1:100.000, en la cartografía IGAC a escala 1:100.000 y el apoyo de fotografías aéreas; donde se reconoce claramente su desembocadura en el río Guamués. También fue verificado por el conocimiento de los investigadores de la zona y los pobladores de la región y en la documentación histórica y geográfica donde se manifiesta que el río verde es un afluente del río Guamués. El acceso a este lugar no fue posible debido a las difíciles condiciones topográficas ya que el relieve en esta zona es abrupto y se encuentra cubierto por selva inhóspita. (IGAC, 2.014)

Figura No. 10 Ubicación del vértice No. 7. Desembocadura del Río Verde en el Río Guamuez. IGAC, 2014.

Considerando lo anterior, se define lo siguiente: **Vértice No. 7**; **“...A partir de la Cota 1.600 metros sobre el nivel del mar, se sigue en dirección Norte, hasta encontrar la desembocadura del Río Verde en el Río Guamuez, punto con coordenadas X: 991855,891106 y Y: 584964,157605; ...”**

7. “...se sigue aguas arriba del Río Verde hasta encontrar su nacimiento en el Cerro del Alcalde ...”

El cerro del Alcalde es un elemento geográfico que se encuentra localizado en cartografía temática como el mapa denominado “Estudios Geológicos en el departamento de Nariño” del Ministerio de Minas y Petróleo del año 1947 a escala 1:150.000 y en el mapa del DANE con base en la Oficina de Longitudes del año 1.950 a escala 1:100.000; también en documentos históricos como el elaborado por el ingeniero Miguel Triana “Por el sur de Colombia: excursión pintoresca y científica al Putumayo”, a la vez en documentos geográficos como el Estado del arte de los páramos de Nariño elaborado por la Universidad de Nariño y CORPONARIÑO; del mismo modo fue reconocido por los habitantes de la zona. Este cerro hace parte del sistema orográfico de la cordillera de los Andes, es una unidad con valles

glaciares con presencia de vegetación de selva alto andina y la geoforma actual es el resultado de depósitos glaciares, donde el cerro más alto es conocido como Alcalde. (IGAC, 2014)

Figura No. 11 Vista del cerro Alcalde desde la laguna La Cocha. Fuente: Germán Narváez. Geógrafo investigador de la Universidad de Nariño. IGAC, 2014.

Figura No. 12 Ubicación del Vértice No. 8. IGAC, 2014.

F-E-SIG-26-V1. Vigencia 09/02/2016

Calle 37 No. 8 - 40
Conmutador (571) 3323400
www.minambiente.gov.co

Considerando lo anterior, se define lo siguiente: **Vértice No. 8; "...se sigue aguas arriba del Río Verde hasta el punto con coordenadas X: 991855,891106 y Y: 584964,157605, en inmediaciones del Cerro El Alcalde; ..."**

8. "...De este punto se sigue por todo el límite con el Municipio de Funes hasta encontrar la cuchilla de Los Alisales..."

A partir de la consulta cartográfica y de fotografías aéreas del IGAC y otras fuentes como Ministerios y entidades estatales, el elemento geográfico cuchilla Los Alisales aparece en el mapa denominado "Estudios Geológicos en el departamento de Nariño" del Ministerio de Minas y Petróleo del año 1947 a escala 1:150.000; actualmente este elemento no se identifica en la cartografía IGAC. Al realizar el trabajo de campo se pudo identificar la geoforma de la cuchilla, la cual hace parte del sistema orográfico de la divisoria de aguas entre los ríos de las cuencas del Patía y la Amazonia; además, forma una barrera natural en la parte suroeste del valle de la laguna La Cocha. La denominación no fue validada, ya que los habitantes de la zona y los diferentes estudios realizados por investigadores no conocen ni denominan ningún elemento geográfico como cuchilla Los Alisales.

Los únicos referentes que se tienen con este nombre es el río que nace en la cuchilla y va a desembocar en el río Sucio, la vereda localizada al suroeste de la laguna de La Cocha y el páramo Alisales. Es posible que el nombre Alisales lo hayan tomado del río Alisales que fluye paralelo a la formación montañosa, a su vez el río toma el nombre por los árboles *Alnus jorullensis* (alisos) que se encuentran en los Andes.

Figura No. 12 Cuchilla Los Alisales y río Alisales. Fuente: Comisión de Trabajo de Campo. IGAC, 2014.

Como se mencionaba anteriormente, esta parte del polígono de que trata la Resolución No. 073 de 1.974 declaratoria de la Reserva Forestal Protectora Nacional de la hoya hidrográfica de la Laguna "La Cocha" y el Cerro "Patascov", se superpone o traslapa espacialmente con áreas del Parque Natural Regional Páramo de las Ovejas-Tauso, por tal motivo fue necesario precisar el límite oeste de la RFPN de la hoya hidrográfica de la Laguna "La Cocha" y el Cerro "Patascov".

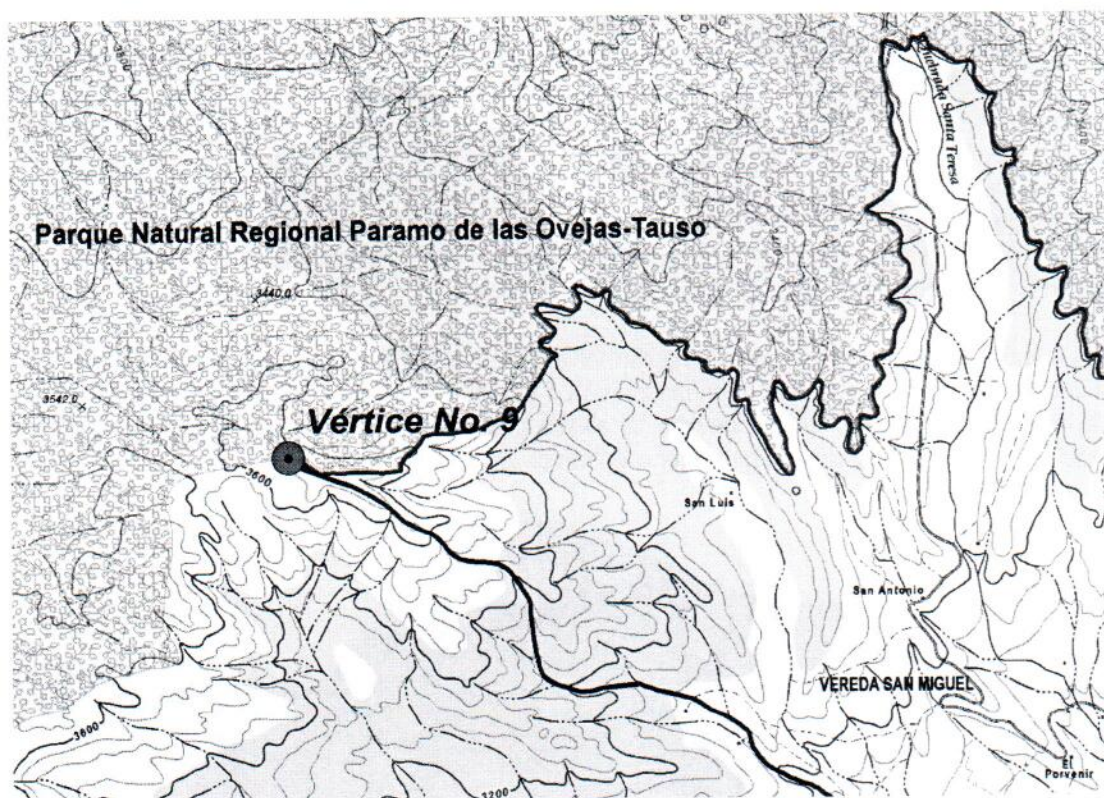

Figura No. 13 Ubicación del vértice No. 9. IGAC, 2014.

Considerando lo anterior, se define lo siguiente: **Vértice No. 9;** "...De este punto se sigue por todo el límite con el Municipio de Funes hasta encontrar el límite del Parque Natural Regional Páramo de las Ovejas-Tauso, punto con coordenadas X: 973649,094137 y Y: 597824,4007; De aquí, se sigue por el límite del Parque Natural Regional Páramo de las Ovejas-Tauso hasta el punto con coordenadas X: 984099,690499 y Y: 605595,694319..."

9. "...De este sitio y por el filo de la cuchilla en dirección Norte – Este, hasta encontrar la cuchilla El Támano, punto de partida "

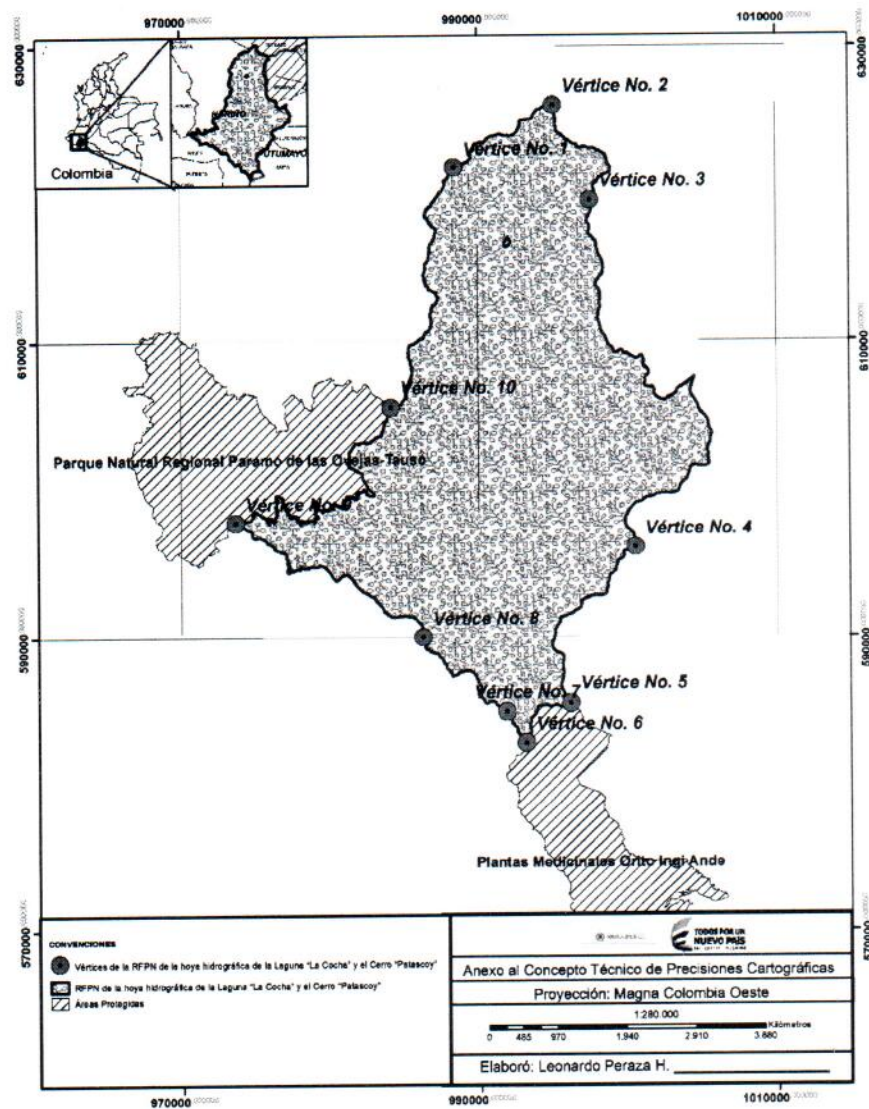

Como se mencionaba anteriormente, esta parte del polígono de que trata la Resolución No. 073 de 1.974 que modifica los linderos de la Reserva Forestal Protectora Nacional de la hoya hidrográfica de la Laguna "La Cocha" y el Cerro "Patascoy", se superpone o traslapa espacialmente con áreas del Parque Natural Regional Páramo de las Ovejas-Tauso, por tal motivo fue necesario precisar el límite oeste de la RFPN de la hoya hidrográfica de la Laguna "La Cocha" y el Cerro "Patascoy", el cual se describe de la siguiente manera:

"...De este sitio y por el filo de la cuchilla de Los Alisales en dirección Norte – Este, hasta encontrar la cuchilla El Támano, punto de partida con coordenadas X: 988401,414019 y Y: 621723,78975."

Las coordenadas que delimitan el polígono ajustado de la RFPN de la hoya hidrográfica de la Laguna "La Cocha" y el Cerro "Patascoy" se encuentran en el anexo 1.

Finalmente, con base en el análisis efectuado, a continuación se presenta el polígono resultante de las precisiones a la materialización cartográfica.

Reserva Forestal Protectora Nacional de la hoya hidrográfica de la Laguna "La Cocha" y el Cerro "Patascory"

3. CONCEPTO

Teniendo en cuenta el análisis y consideraciones anteriormente expuestas, se recomienda proyectar el acto administrativo mediante el cual se acojan las precisiones cartográficas propuestas al artículo primero del Acuerdo No. 58 de 1.973, aprobado por la Resolución Ejecutiva No. 73 de 1.974. del Ministerio de Agricultura, por el cual se modifican los linderos de la Reserva Forestal Protectora Nacional la hoya hidrográfica de la hoya hidrográfica de la Laguna "La Cocha" y el Cerro "Patascoy".

La descripción del límite se encuentra en Sistema de coordenadas planas Magna-Sirgas Colombia Oeste y sería la siguiente:

"Partiendo de la cuchilla El Tábano en el cruce de la carretera que conduce al Encano, punto con coordenadas X: 988401,414019 y Y: 621723,78975; se sigue por esta cuchilla hasta llegar al Cerro Bordoncillo a 3.700 metros de altura sobre el nivel del mar, punto con coordenadas X: 995090,593059 y Y: 626090,360494; de este punto y bordeando la cuchilla hasta llegar a la parte más alta del Cerro Capuchino, en la región denominada como Páramo de La Piscicultura, punto con coordenadas X: 995090,593059 y Y: 626090,360494; de este punto y bordeando la cuchilla que sirve de límite entre el Departamento de Nariño y el Departamento del Putumayo, pasando por la zona de páramos Azonales, hasta encontrar los picachos del Cerro Patascoy, punto con coordenadas X: 1000533,44949 y Y: 596084,801623; se continúa por estos (3.000 metros sobre el nivel del mar) hasta encontrar la divisoria de aguas entre el Río Guamués y el Río Patascoy, punto con coordenadas X: 996137,894133 y Y: 585527,383904. De este punto, se sigue por el límite del Santuario de Flora "Plantas Medicinales Orito - Ingi Ande" y que sirve de divorcio de aguas entre el Río Guamués y el Río Patascoy, hasta encontrar la Cota 1.600 metros sobre el nivel del mar, punto con coordenadas X: 993145,229926 y Y: 582866,928649. A partir de la Cota 1.600 metros sobre el nivel del mar, se sigue en dirección Norte, hasta encontrar la desembocadura del Río Verde en el Río Guamuez, punto con coordenadas X: 991855,891106 y Y: 584964,157605; se sigue aguas arriba del Río Verde hasta el punto con coordenadas X: 991855,891106 y Y: 584964,157605, en inmediaciones del Cerro El Alcalde. De este punto se sigue por todo el límite con el Municipio de Funes hasta encontrar el límite del Parque Natural Regional Páramo de las Ovejas-Tauso, punto con coordenadas X: 973649,094137 y Y: 597824,4007; de aquí, se sigue por el límite del Parque Natural Regional Páramo de las Ovejas-Tauso hasta el punto con coordenadas X: 984099,690499 y Y: 605595,694319. De este sitio y por el filo de la cuchilla de Los Alisales en dirección Norte - Este, hasta encontrar la cuchilla El Tábano, punto de partida con coordenadas X: 988401,414019 y Y: 621723,78975."
